

PhD position at UPC/UB:

<https://euraxess.ec.europa.eu/jobs/849834>

University of Barcelona/Polytechnical University of Catalonia UB-UPC, on a Collaborative Project for Electronic Structure and Artificial Intelligence for Magnetic Devices in Quantum and Neuromorphic Computing, is looking for a PhD researcher with a profile in Engineering background with specialization in un/semi-supervised machine learning architectures, graph neural networks and python programming. The aim of the project is a teamwork of researchers with profiles in computer science and computational chemistry to search for more suitable magnetic molecules and materials as qubits and memristors for Quantum and Neuromorphic computing, respectively.

Please send your CVs at j.ruiz@upc.edu and eliseo.ruiz@qi.ub.edu.
