Internship offer for CV master student

CTRL4 ENVIRO offers an internship for a student of the Master in Computer Vision, graduated in Telecommunication or Computing engineering or other technical-scientific studies.

From its offices at the UAB campus and upon the basis of its own research, CTRL4 ENVIRO develops environment monitoring systems based on image and video analytics. Those systems are then deployed both for administration and private customers in the global market.

Required:

- Deep Learning applied to image and video analytics.
- Comfortable with Py Torch and Python.
- Strong background in programming. Used to Git.
- Linux.
- English at working-language level.

The student will start supporting in the dataset generation and training and deployment of neural networks, and in the research of papers for the state of the art.

Offered:

- Between 12 and 20 hours a week of work.
- Flexible office timetable according the student availability.
- Immediate engagement.
- Working place in the UAB campus, at the Eureka building.
- Remuneration: 11€/h under UAB's Servei d'Ocupació agreement.

Real possibilities of developing the Master Final Thesis in the company and of being engaged at internship's termination.

Interested, send CV to Anton Gomà, anton.goma@ctrl4enviro.com

Active offer till covering the post.
